

P2 Mathematics
Methods of sharing

Name: _____ ()

Date: _____

If Flora has not picked the 13th bean, what will happen? Share the beans equally between the crickets. Follow the instructions and fill in the blanks.

1.		<p>Share 12 beans between 2 crickets.</p> <p>Each cricket gets _____ beans.</p> <p>_____ bean(s) is/are left.</p>
2.		<p>Share 12 beans between 3 crickets.</p> <p>Each cricket gets _____ beans.</p> <p>_____ bean(s) is/are left.</p>
3.		<p>Share 12 beans between 4 crickets.</p> <p>Each cricket gets _____ beans.</p> <p>_____ bean(s) is/are left.</p>

4.

Share 12 beans between 5 crickets.

Each cricket gets _____ beans.

_____ bean(s) is/are left.

5.

Share 12 beans between 6 crickets.

Each cricket gets _____ beans.

_____ bean(s) is/are left.

6.

There are always some remaining beans when we share with 5 crickets. How many beans should Flora and Ralph pick if they do not want any remaining beans when sharing with their 3 other friends?

Draw the number of beans below.

Share _____ beans between _____ crickets.

Each cricket gets _____ bean(s).
