

Printable Worksheet with Teaching Notes

Points to note / Concepts to illustrate while using the exercise:

1. Only figures enclosed by closed paths have perimeters
2. Find the perimeters of different figures through measurement (and addition)
3. Perimeter of a square = $4 \times$ length of any one side
 - All sides of a square are equal in length
4. Perimeter of a rectangle = $2 \times$ (sum of two adjacent sides)
 - Opposite sides of a rectangle are equal in length
5. How to find the perimeters of polygons effectively

Name: _____

Date: _____

Measure and find the perimeters of the following figures.

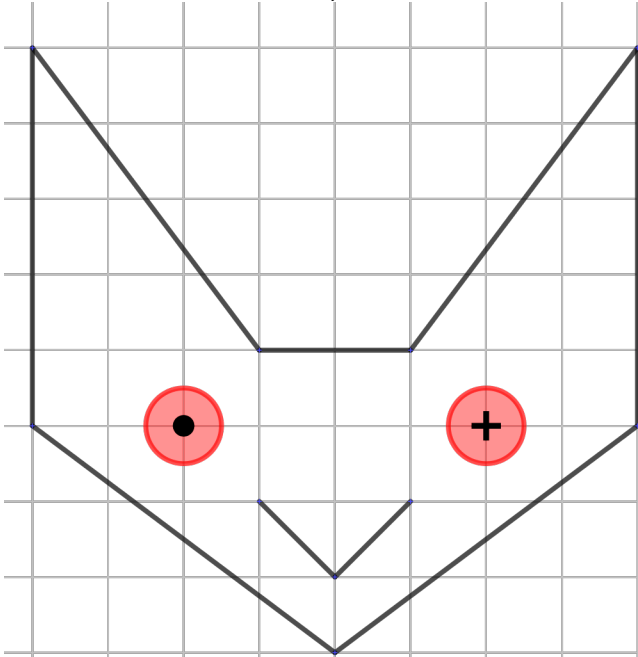

Figure 1

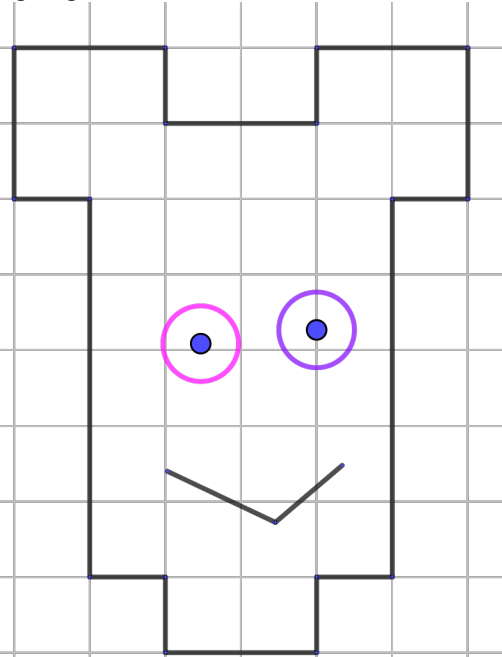

Figure 2

Perimeter of Figure 1	Perimeter of Figure 2
=	=
=	=

Find the lengths of the other two sides of the square. Calculate the perimeter.

Find the length of the remaining side of the rectangle. Calculate the perimeter.

Find the lengths of the other two sides of the rectangle. Calculate the perimeter.
